

Cyperator®25EC Application

Apply diluted according to recommendations for use, with sprayers manual or motorized, atomizers or thermo nebulizers. Very low impact on non-target beneficial organisms

- ▶ **Control of subterranean termites:** Dilution 100 ml in 10L water
- ▶ **Pre-construction treatment:** Before paving, apply 5 liters of the syrup per m² on the ground. After the structure, trench along it, 15 cm wide and 30 cm deep; apply approximately 5 liters of syrup per linear meter.
- ▶ **Post-construction or barrier treatment:** After inspection of the infestation points, the entrances and accesses of the termites. With the plan of perforation the floor along the entire perimeter of the walls and structures to be protected with holes every 30 cm. Apply the product until forming a continuous barrier throughout to apply approximately 5 liters of syrup per linear meter.

Insect pests	Dilution rate	Application
Faying & Crawling Insects	5 ml / L	Residual surface spray
	20 ml / L	Thermal fogging
	40 ml / L	ULV
Dry wood Termite control	50 ml / 10 L	Injection or spraying
Formosan subterranean termite	100 ml / 10 L	Injection or spraying

* For control of dry wood termites, dilute the product in isoparaffin or other and apply or inject into wood or surfaces to be protected.

PROFESSIONAL PEST MANAGEMENT

POTENT AND VERSATILE INSECTICIDE FOR STRONG IMPACT CONTROL

Recommended for situations that require a greater knockdown effect and for the preventive and curative control
